

Interpreting Medieval Monuments: Iconography and Meaning

One day CMS conference, London, 17 March 2018

Senate House, Malet Street, London WC1E 7HU

Much attention has been paid in recent years regarding medieval monuments to attribution, style, workshop origin and dating but far less to iconography and the various ways in which those who read them intended them to be 'read' or otherwise experienced. This conference is intended to address that lacuna and includes papers on both English monuments and those in continental Europe.
